

Vermont Bar Association
2021 Tech Conference
January 26, 2021
2pm - 3pm

Tech Tools to Increase Your Law Firm's Efficiency

Sponsor: Clio

Speaker: Rio Peterson

Find out how you can leverage legal technology to improve efficiencies in your law firm and add more hours to your day. This session will cover creating an automation plan and will explore different tech tools that you can use to automate email correspondence, billing, document management, and other law firm processes.

Rio Peterson is the Affinity Programs Coordinator at Clio. She joined Clio in 2017, initially as a member of Clio's award-winning Customer Support team. As a Support agent, Rio gained an in-depth knowledge of Clio's products and customers; knowledge that she draws from regularly. Now, as the Affinity Programs Coordinator, Rio works to build and foster flourishing relationships with legal associations across the United States and Canada.

In addition to her talent for building partnerships, Rio is passionate about educating lawyers on the importance of using data to understand legal trends, build better practices, and to drive the legal industry forward. In 2018 she was chosen to speak at the Clio Cloud Conference and, most recently, she spoke on Clio's Legal Trends Report at the Federation of Ontario Law Association's Annual Plenary.
